For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(54) Title: COMPUTER KEYBOARD

(57) Abstract: A computer keyboard that includes features which assist a child in learning how to type. The keys have different colors based upon the function of the keys. The number keys are physically separated from the letter keys by a gap to prevent accidental contact with the number keys while typing words. The keyboard includes a mechanism which disables the normal repeat function. This mechanism prevents the repeated typing of a letter or number regardless of how long the key is pressed.
